### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Drawings*

1. The corrected or substitute drawings were received on January 14, 2003. These drawings are approved by the examiner.
2. The corrected or substitute drawings were received on July 28, 2003. These drawings are approved by the examiner.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11-14, 16 & 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoffmann et al., [U.S. Patent No. 3,531,169]. Hoffmann (figures 1-9) teaches of a chest (10) being provided with a vertical mast (79 for example) on which supports (82) are fixed, the chest having lifting means (64 and associated elements) in the chest for moving the mast in vertical translation, the supports being movable in rotation about an axis which coincides with the mast [rotatable with respect to the mast]. The chest being suitable for maintaining a constant temperature (see spec.), the mast being adjacent to one of it's vertical edges (figs. 7), the chest including a housing (32) for thermal blocks, the chest including a spacer (80 for example) located

between the supports on the mast, a retractable guide (77 for example) for facilitating insertion of the supports, and the chest including casters (20) on a bottom thereof.

*Response to Arguments*

5. Applicant's arguments filed July 28, 2003 have been fully considered; it is viewed that the arguments directed towards the Novak reference are persuasive [It is noted that Novak teaches of a chest combined with a casing (25 or 30) which contains the "lifting means", as such, the reference is still deemed pertinent {under 103 rejection purposes e.g.,} but would not support a 102 rejection in view of applicant's remarks]. As to the arguments directed towards the Hoffmann et al., reference, it is viewed that these remarks are not persuasive. The examiner has given a reasonably broad interpretation of the limitation "said supports are movable in rotation about an axis which coincides with said mast" as meaning that the prior art supports must be movable in rotation {pivoting} about an axis {pivoting point} which coincides with the mast {viewed as any point on the mast}. It is noted that the phrase "about an axis which coincides with said mast" is not interpreted the same way as the phrase "about an axis which coincides with the longitudinal axis of the mast" for example [applicant is merely claiming that the supports move relative to an axis that coincides with the mast - **as opposed to** the supports rotating about a longitudinal axis of the mast].

*Allowable Subject Matter*

6. Pending further consideration, Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

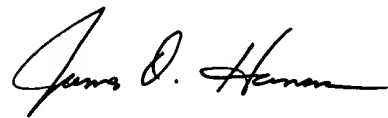

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
